"The Piper's Dream" (P.McNulty) [transposed from Gm]

lower notes in mm 10,13,14 optional

This sounds a lot like one of those "vaudeville" hornpipes from the Cole or Harding collections, with loads of accidentals and out-of-range notes. I did my best to make this playable for everybody (I'm still not sure how a piper could manage this tune - maybe Pat composed it on another instrument.)
